5 year strategic business plan template word. Making a 5 year business plan. 5 year business plan ideas. What is a 5 year plan for a business. What to include in a 5 year business plan. Create a 5 year plan template.

One of the reasons that so many small businesses fail is that they don't do the necessary up front work to create an accurate and realistic business plan. Creating a business plan doesn't guarantee success, but the process of writing a plan is critical for any successful new business. It isn't our goal to try to tell you everything you need to know about creating a business plan. Instead, our goal is to make the process easier by providing a professionally designed business plan template that you can edit easily using Word and Excel. Advertisement Update (7/22/2016): We've added a basic break-even analysis worksheet to the companion Excel workbook. Description This template provides a business plan outline with sample questions, tables, and a working table of contents. It was created for newer versions of Word and Excel (Office 2007 or later) so that you can easily change the fonts and color scheme and the file will be compatible with the mobile and web-based Word & Excel apps. It is best to use Excel for financial statements, data tables and charts. So, we have provided a companion Excel workbook with these sample financial statements and other tables and graphs that you can copy and paste into your Word document. The companion workbook combines many of the different spreadsheets you can find on Vertex42.com, but customized specifically for inclusion in a business plan. Using the Business Plan Template Editing Headings and Table of Contents Word allows you to assign format Styles to text and paragraphs, and we've designed the template to use these Styles for defining headings, sub-headings, and figure captions. If you want to add a new section so that the Table of Contents updates correctly, just add a new heading in the body of the document and assign it the Heading 1 or Heading 2 style. To update the Table of Contents, click on Update Table and then "Update entire table." Copy/Paste From Excel to Word For simple tables, you can use Copy/Paste (Ctrl+C / Ctrl+V) to copy a table from Excel to Word. This will typically paste the data as a formatted and editable table in Word, though none of the formulas will be functional within Word (and the table will not be linked to Excel). If you don't want the table to be editable in Word, you can "Paste as a Picture" using Paste Special or by choosing the "Picture" option when you right-click in Word to paste the table. Important: When you paste a chart object into your business plan, make sure to "Paste as a Picture" because pasting the chart as an embedded object means that the entire spreadsheet becomes embedded in your Word document (even though what you see is only the chart). If you want to insert a table into Word as a "Linked Object" so that when you edit Excel, the table in Word will update automatically, you may have a more difficult time preserving the formatting of the original. However, at the least the entire spreadsheet won't be embedded within your business plan Word document. Create a Five Year Plan in Just 6 Simple Steps Step 1: Open a File Format If you want to create a five-year plan, you need to first begin by opening a file format such as Google Docs, MS Word, or Pages. After opening your desired file format, open a new document and start designing the title page. On the title page, mention the name of the company and the name of the plan. You should highlight the name of the plan at the center of the page. Step 2: Table of Contents After the title page, the next page should be allocated for the "table of contents" section. Write down the headings, sub-headings and page numbers so that it is easier for the reader who is going through the document to understand which content is placed where. Step 3: Executive Summary After drafting the contents page, move on to the next page where you can begin mentioning the executive summary of the five-year plan. Include the vision, mission and organizational structure of the company. Step 4: 5 Year Plan Next, write down the goals that you would like for your company to achieve in the next five years. Start with the overall goal and then mention step by step goals that need to achieve in each year. Step 5: Action Plan This section follows after mentioning the yearly plan. In this, you need to write what is the plan to be carried out to achieve the milestones year wise. Step 6: Program Risks Program risks are to be addressed towards the end of the document. The modified risks along with their priority level and action plan are to be entered here. You can enter these details in a tabular column.
